

5.- Health & Safety Policy

Our Hotel provides health and safety education to its staff. There exists a Health and Safety committee that has monthly meeting regarding this aspect. There are several points that can be highlighted:

- Accidents prevention by managing the health and safety risks in the workplace.
- Clear instructions, information, and adequate training are delivered to ensure that employees are competent to do their work.
- Emergency procedures are in place, for example evacuation in case of fire or other significant incident.
- The working conditions and the equipment used are kept safe, and as well the safe storage/use of the substances is strictly controlled.
